

TRUMPF

NEW!

TRUMPF Shears S 160-6 The smallest in its class!

The newly designed shear head and the small motor make the TRUMPF Shear S 160-6 extremely compact, small and manoeuvrable. An outstanding tool in its class.

It is suitable for cutting steel, stainless steel, non-ferrous metal as well as other material such as plastics and PVC.

The fixed blade carrier made from high tensile steel and the exact positioning of the cutters make the shear easy to use and guarantee excellent curve cutting.

The four-edged cutters are easy to change. TRUMPF's top and bottom cutter are identical.

Apart from the standard cutters for mild steel, TRUMPF offers specially manufactured chrome cutters for cutting high tensile material.

The S 160-6 is used, for example, in trimming cover plates, notching and cutting from parts to size.

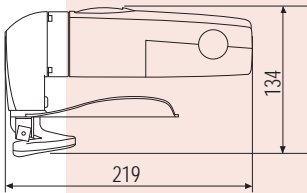

TRUMPF Shears S 160-6 – a new milestone in TRUMPF's product programme – Power Tools.

Areas of application:

- Ventilation/Plumbing
- Elevator construction
- Shop installations
- Repair shops
- Recycling
- Locksmiths

NEW!

S 160-6

- The well designed fixed blade carrier ensures easy, effortless handling
- Very manoeuvrable, minimal interference contours because of its small size
- Durability reduce operating expenses
- Excellent grip width
- Waste guide for safety

TRUMPF Shears		S 160-6
Max. sheet thickness		
Steel 400 N/mm ²	mm	1.6
Steel 600 N/mm ²	mm	1.2
Steel 800 N/mm ²	mm	1.0
Aluminium 250 N/mm ²	mm	2.0
Working speed	m/min	8-12
Start hole diameter/depth	mm	27
Smallest radius	mm	15
Motor rating	W	350
Strokes at nominal load (at 1.5 mm)	1/min	6400
Weight (without cable)	kg	1.6
Protective insulation	Class	II

Machine incl. standard equipment

Four-edged cutters	044502
Allen wrench DIN 911-2	002946
Allen wrench DIN 911	094840
Case	135280
Operating instructions	947984

Wearing parts

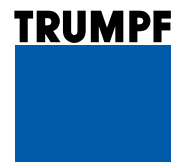

Four-edged cutter	044502
Four-edged cutter Cr	144155
Set of spare parts (2 x 044502)	126471
Set of spare parts (2 x 144155)	919760

Sous réserve de modifications techniques
